A product by MRS, LLC

MRS Software Solutions  
"Small town accessibility and values, paired with cutting edge solutions"

MRSAuditQ is the brand-new auditing software from Medical Management and Reimbursement Specialists.

- Designed by auditors
- Developed by experts in medical software
- Provides auditing and reports for the coder, provider and facility

#### Features

- Create chart audit queues that meet OIG standards for randomization
- Review charts, enter coding corrections and supporting notes.
- Audit a specific coder and provide education notes and metrics
- Supports both Inpatient and Outpatient chart audits.
- Create customized rules to enhance feedback and reporting.

MRS  
AUDITQ™

#### Client Focused

Since our inception, we have looked beyond the routine found ways to achieve maximum return for our clients.

We serve our clients by focusing on procedures, education, accuracy and compliance. Our efforts to anticipate the needs of this ever-changing industry have brought forth MRSAuditQ and with it, we consider ourselves an extension of your facility and part of your team

Talk to your team about adding auditing software that is compatible with all EMR systems. Our product will identify missed revenue, highlight education opportunities and reduce risk of non-compliance. Simply select your search criteria to build your random sample, review the charts and let MRSAuditQ score your audit and generate detailed reports.

Then tell us what you think...
